

STEP 1: MAKE A YELLOW CROSS

HOLDING YOUR RUBIK'S CUBE

Match your Rubik's Cube to one of the pictures below. Focus on the **YELLOW** edges on the **UP (U)** face only (not corners).

Action 1 Follow this algorithm.

Remember this algorithm as **FUR** says **U'R'F'**.

Notice the first three moves go clockwise and the next three moves go counter-clockwise.

Action 2 If the **YELLOW** Cross is not formed yet, **REMATCH** your Rubik's Cube to one of the pictures in the 'Holding your Rubik's Cube' section above and follow the algorithm again.

When your Rubik's Cube looks like this picture, move on to the next step!

STEP 2: ORIENT THE CORNERS

HOLDING YOUR RUBIK'S CUBE

Hold your Rubik's Cube so the **UP (U)** face matches one of the images in the table below.

If one corner piece is **YELLOW**

This saying may help:
'Feed the fish'

Hold your Rubik's Cube so the fish can eat out of your **LEFT (L)** hand.

If **no** corner pieces are **YELLOW**

This saying may help:
'None - left'

Hold your Rubik's Cube with a **YELLOW** tile on the **LEFT (L)** face.

If **two** corner pieces are **YELLOW**

This saying may help:
'I see two, my left thumb's on you'

Hold your Rubik's cube so that you can put your left thumb on the tile on the **FRONT (F)** face.

Action 1 Follow this algorithm.

Notice the **RIGHT (R)** face turns in opposite directions every other time and the **UP (U)** face always turns clockwise.

Action 2 If you do not have all yellow tiles on the **UP (U)** face you will need to **REMATCH** and follow the algorithm. (You may need to do this multiple times.)

When your Rubik's Cube has all the **YELLOW** on the **UP (U)** face, like this picture, move to Step 3!

STEP 3: POSITION THE YELLOW CORNERS

HOLDING YOUR RUBIK'S CUBE

Hold your Rubik's Cube with the **YELLOW** on the **UP (U)** face.

Action 1

Twist the **UP (U)** face until two corners are in the correct location. You will know they are in the correct location if the colored tiles match the center colors.

**CORRECT
CORNER
EXAMPLE**

Action 2

Hold your Rubik's Cube so it matches one of the images here.

Adjacent Corners (on the same face)

Diagonal Corners

THINK OF CORRECTLY PLACED CORNERS AS TAIL LIGHTS.

Tail lights are in the back of a car. Hold your Rubik's Cube so the tail lights are on the **BACK** face before you start the algorithm.

Action 3

Follow the algorithm below.

R'un to me Fast R'un to me Back Back

After this part of the algorithm, the top of your Rubik's Cube will look like this:

Run away Fast R'un to me Back Back

After this part of the algorithm, the top of your Rubik's Cube will look like this:

Run Run away

U'p

CHANT

The words underneath the turns are a chant to help you remember the algorithm.

Action 4

If your corners are not correct at this point, rematch your Rubik's Cube to one of the images in **Action 2** and repeat the algorithm.

When your Rubik's Cube looks like this picture, move on to the final step!

STEP 4: POSITION THE YELLOW EDGES

HOLDING YOUR RUBIK'S CUBE

Hold your Rubik's Cube so the one face that is a solid color is the **BACK**, and the Yellow face is the **UP (U)** face.

If no face is a solid color, it doesn't matter which face is in the back.

EXAMPLE

Action 1

Follow this algorithm up to 3 times to move the unsolved edges **CLOCKWISE / TO THE LEFT**.

If you restart the algorithm, make sure a solved face starts as the **BACK** face of the Rubik's Cube.

BEFORE STARTING THE ALGORITHM, look at the unsolved edge on the **FRONT** face. Is it the same color as the center tile of the:

- **LEFT** face?
Follow the algorithm above.
- **RIGHT** face?
Change the two **U** turns to **U'**.

CONGRATULATIONS!

You have solved the Rubik's Cube!
